EDUCATION

Sardar Patel Institute of Technology

Bachelor of Technology in Electronics and Telecommunication

CGPA: 8.11

Mumbai, India

Aug 2023 – July 2027

Vizuara AI

Minor in AI

Remote

Feb 2025 – Present

DAV Public School

Senior Secondary (CBSE)

Grade/Percentage: 83%

Nerul, India

Completed 2022

PROJECTS

Document Query Engine

Aug 2025

FastAPI, FAISS, BM25, Sentence Transformers, Gemini 2.5 Flash, SQLite, Redis

- Designed and implemented a document query engine that ingests documents and answers user queries using hybrid retrieval (FAISS + BM25), ensuring responses are grounded in relevant document context.
- Implemented answer verification and confidence scoring using Gemini 2.5 Flash, enabling explicit refusal of unsupported queries and improving response reliability.
- Built a persistent and auditable query pipeline using SQLite as the system of record and Redis for ephemeral controls such as deduplication and rate limiting.

CityPulse — Civic Issue Management Platform

Feb 2026

Next.js, React, TypeScript, MongoDB, Tailwind CSS, NextAuth.js, Cloudinary, Vercel

- Built a civic issue management system using Next.js and MongoDB to aggregate duplicate complaints by location and department, leading to consolidated and demand-driven issue tracking.
- Implemented role-based backend workflows using Next.js serverless APIs and database-backed access control for citizens, authorities, and staff, leading to structured ownership and traceable issue resolution.
- Deployed the complete application on Vercel with environment-based configuration and MongoDB integration, leading to a live platform supporting authenticated users and persistent data workflows.

ACHIEVEMENTS

- Finalist at HackFusion, a hackathon organized by IEEE SPIT, Feb 26

TECHNICAL SKILLS

Programming Languages: C++, Python,

Core Competencies: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOPS)

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, SQLite3, React

Developer Tools: Git, GitHub, VS Code, Ubuntu 22.04, WSL, Arduino IDE, MATLAB, Scilab

Databases: SQL **Web Technologies:** HTML, CSS
